[Hey Hey Boys \(#p14470\)](#)

by [darkfoxes](#) » Sun Jun 21, 2009 4:40 pm

Hey everyone...

Lets see..

I am from Brisbane, Australia, I'm 25 female.

I am not new to the carding scene, I have been hacking for 14 years and carding for 8 years.

I have been a member of the good ole Shadowcrew, ccpowerforums, carders.eu, I was a member of carders.info but I guess when they got hacked a couple times they made a new User DB and yes I think there is a rat in there new carder.su.

I left the carding scene after ccpowerforums got shutdown that and I got caught in a sting in 2001 (yay) atleast you don't see many females getting caught for cyber crimes..heh

I know asp, php, c/c++, java, perl, python, sql, oracal, cpanel, unix, linux, asm...and ninja skillz

I have worked for Aussie banks in comsec.

I have done ID Printing, credit card printing/embossing, pp making, birth certs making..etc in the past I also installed a skimmer into a casino to get dumps as I didn't have a pinpoint cam at the time.

I done phishing of USA, UK, Aus banks before and the norm of ebay, paypal... (who hasn't)

Hmm the best thing and most risky thing I have done...

Risky: installing the skimmer in the casino.

Best carding: Carded a \$5,000 laptop off dell and got it dropped (dell xps custom setup using fullz and phone)

Best Hack: Rooted a webserver with my friend that was hosting 5000 servers (yummy roots)

Funny Hack: I did the Offensive Security certification 2 years ago and wanted to share there prac servers to friends..so hacked into them 4 months later and installed a rootkit into there linux server and just setup a tunnel so they could connect without ssl or vpn.

Anyway..

Getting back in, just doing small things buying some cvv, I have my own Aussie drops (5 atm) May share later, Then getting GSM Skim soon and will be setting up a ID Print/Birth Cert prints soon (only for Aussies).

Very Interesting, probably better Intro then mine
And u don't just seem to be some1 who talks about shit, but actually does it too xD
I'm likin your achievements too, and how u still come back after u got caught lol
Thanks too, i'm trying my best to keep the Rats out...

PS – PM me if u want to get into the Special Group (girls only)

Welcome

Yea getting caught wasn't to bad..I didn't goto jail..I got set bail for \$10,000 which to me at that time wasn't much.

Special Group you say..I'm not that special..just your average female hacker..hehe

Thanks for the Welcome N2C

p.s You should install a rat-trap..that detects certain ip's onto your server scripts and warns you via smtp logs or just logs there IP.

or just get some cheese..hehe
